

# Complete interior solutions

**Newbury Interiors**  
FROM DESIGN TO COMPLETION

# Our designs reflect your business

We work closely with you to produce an interior environment to impress your clients and provide an inspirational place of work. Our team designs, creates and manages projects from start to finish, to ensure maximum client satisfaction.

We ensure that the project partners work together to realize your new interior workplace. Our wide range of clients have asked us to help them with every type of working space, including call centres, boardrooms, receptions, washrooms and breakout areas.

Newbury Interiors works throughout the Thames Valley area. If you would like to find out more, visit [www.newinteriors.co.uk](http://www.newinteriors.co.uk) or call (Freephone) 0800 161 3027.

## **Project management**

A project manager will be involved from the initial meeting through to completion of the project.

The project manager produces a technical design. This will incorporate the partitioning, ceilings, flooring, environmental services, decoration, blinds and furniture.

A quotation is then produced, based on this design.

Managing the project in its entirety, our project manager works closely with you and with our directly employed team – as well as coordinating other specialists to provide an integrated installation.

## **Planning and design advice**

Our proposals can include a full design and space plan. We can produce computer aided design images in both 2D and 3D, so that you can have a realistic view of what your completed project will look like. Customers who have produced their own plans can send them to us electronically.

Each design is produced with Building Regulations, Health and Safety, ergonomics and safe working practices in mind.

We pride ourselves on the high levels of service we offer, regardless of job size, both during and after the project. This aspect of Newbury Interiors is highly valued by our clients and is borne out by the numbers of clients that return to us for subsequent projects.

“The employees are extremely well qualified and helpful with whatever issue we have had to resolve. Their workmanship is always to a high standard. We would always recommend Newbury Commercial Interiors”.

Ava Williams, Production Administrator  
Astron Document Limited

### Ten good reasons to use Newbury Interiors...

- 1** We provide a complete interior solution.
- 2** Our project managers provide a single point of contact to coordinate all aspects of the project.
- 3** Highly skilled and qualified staff.
- 4** We work to the latest Health & Safety and Building Regulations.
- 5** Experience working on small to large scale developments.
- 6** Close links to specialist trades enable us to provide a seamless solution.
- 7** Member of the Association of Interior Specialist and an Armstrong Recognised Interior Contractor.
- 8** Flexible finance arrangements that can be tailored to suit the individual project.
- 9** A full after sales service.
- 10** Using our space planning expertise we can work out the most efficient use of space.

### **Suspended ceilings**

We have the ability to design and construct ceiling systems of all types and complexity, from modular grid through to a sophisticated purpose built, high performance ceiling system.

With access to a vast range of manufacturers such as Rockfon, Ecophon, Armstrong, British Gypsum, Burgess and SAS International, we can provide ceiling solutions to meet any performance specification.

### **Partitioning**

We provide partitioning systems that meet the needs of today's modern working environments. They create space – dividing work areas to provide practical solutions.

We can select from a range of high quality manufacturers to offer a partitioning system to match all your performance and visual requirements.

We have a range of solutions that can be tailored to your needs.

### **Floor coverings**

For today's modern office environment there is a wide choice of hard wearing, attractive floor coverings. At Newbury Interiors, we have access to all the major suppliers offering our customers the best selection, catering for all aesthetic and cost requirements. The choices range from carpet tiles through sheet carpet and vinyl to safety and rubber flooring.

**“Their staff are reliable and supportive. Each project is professionally handled and completed on time and within budget”.**

Pat Noble, Facilities Operations Manager  
West Berkshire District Council

### **Decoration**

Knowing which colours go together to create the right image can be difficult. With our wealth of experience and expertise we can produce colour schemes to suit your requirements. You may want to achieve a pure, clean and breezy feel to your office, a natural relaxed colour scheme, or maybe a scheme containing soft, subtle and muted shades to give your office a cool contemporary feel. The choice is limitless.

### **Blinds**

As part of our refurbishment package we are happy to supply vertical louvre, venetian, timber, roller and blackout blinds for commercial premises.

### **Storage**

We work with our clients to create storage environments that maximise space and efficiency. We offer an all embracing service from survey and planning through to installation.

### **Reception desks**

From classic designs to contemporary styles, we offer a range of modular and bespoke reception desks.

### **Desking**

We can provide a wide choice of business furniture from many leading manufacturers. You have the choice between the feel and appearance of real wood veneer or the robust surface finish of melamine laminate. We also offer furnishing systems that organise your workstation.

### **Floors**

Installing mezzanine floors in commercial buildings has several advantages, maximising the available space being the most obvious. Utilising the height of a building rather than considering relocation, could prove very cost effective.

### **Seating**

We are able to provide a wide range of seating from technical to classic styles. Our commitment is to good ergonomic and robust designs, ensuring the comfort and the safety of the user. Our seating is sourced from many top manufacturers, this means that we can add many applications and environments in accordance with specific industry and technical standards.

**“We set high standards and can be very demanding. Newbury Interiors met the challenge with sound advice on design aspects and fulfilled the project to the agreed quality standard, on time and within budget”.**

Martyn Wright, Group HR Director  
Azzuri Communications

### Environmental services

To enable us to provide a complete interior solution, we work closely with specialists producing individual schemes in the following areas: Air conditioning, Electrical, Lighting, Data, Plumbing and Audio Visual. With each aspect being managed at one central point, it gives us greater flexibility. Communication is also improved between the suppliers.

### Safety and regulations

Health and Safety is of paramount importance. We take a tremendous amount of care at the start of every project. We will ensure each job complies with the latest Building Regulations and, when appropriate that planning laws are complied with.

We have directly employed staff who are NVQ qualified in interior construction. They also have relevant Health and Safety training, as well as accreditation by the Construction Skills Certification Scheme (CSCS).

All our work conforms to current Health and Safety regulations. At the start of each project, we will compile a full risk assessment and method statement. Construction Design Management Regulations are implemented as appropriate.

### Finance

Making a capital investment is important to the long term viability of your business.

Leasing is not just a way of paying for your refurbishment but it can be used strategically to organise your finances over a set period.

“I have no reservations about recommending Newbury Interiors to any interested party as a dynamic, flexible company that can flex its muscle and achieve the near impossible”.

David McCarthy  
UK & Irish Facilities Manager  
Huawei Technologies (UK) Co Ltd
